OVERVIEW

Dimension 4: Empowering rigorous content

Key Question 4.1.: Does each student have access to high-quality and culturally relevant curriculum and instructional materials?

OVERVIEW

THE ADVOCATES' GUIDE

Improving Education
Resource Equity

ALLIANCE FOR RESOURCE EQUITY
Uniting advocates and education leaders
to unlock excellence for every student.

No two children are alike. Parents and teachers understand this intuitively. And they respond by working to provide the right combination of supports at the right time to meet each child's unique needs so they can achieve their biggest dreams.

Yet many schools and school systems don't follow this example. They are set up as if all students need the same things. Worse yet, students of color and students with higher needs — such as students from low-income backgrounds, students with disabilities, English learners, and students experiencing homelessness, foster care, or the juvenile justice system — are often less likely than their peers to have access to the high-quality learning experiences that research tells us are necessary to prepare them for college and career.

But, change is possible and is happening in districts across the country as school systems assemble the right combination of resources to support every student — including strong and diverse teachers and school leaders, empowering, rigorous content, student supports and interventions, and the funding necessary to pay for it all. This is what we call **education resource equity**.

The Alliance for Resource Equity has developed an **Education Resource Equity Toolkit** to support district leaders and community advocates in moving from learning about education resource equity to assessing their own system to taking action to eliminate inequities.

SAMPLE MEETING AGENDA

Improving Education
Resource Equity

ALLIANCE FOR RESOURCE EQUITY
Uniting advocates and education leaders
to unlock excellence for every student.

No two children are alike. Parents and teachers understand this intuitively. And they respond by working to provide the right combination of supports at the right time to meet each child's unique needs so they can achieve their biggest dreams.

Yet many schools and school systems don't follow this example. They are set up as if all students need the same things. Worse yet, students of color and students with higher needs — such as students from low-income backgrounds, students with disabilities, English learners, and students experiencing homelessness, foster care, or the juvenile justice system — are often less likely than their peers to have access to the high-quality learning experiences that research tells us are necessary to prepare them for college and career.

But, change is possible and is happening in districts across the country as school systems assemble the right combination of resources to support every student — including strong and diverse teachers and school leaders, empowering, rigorous content, student supports and interventions, and the funding necessary to pay for it all. This is what we call **education resource equity**. **Education resource equity** is what we need to make sure that school unlocks every child's power to live a life of their choosing — and that race and family income no longer predict a student's life trajectory.

The **Alliance for Resource Equity** has developed an **Education Resource Equity Toolkit** to support district leaders and community advocates in moving from learning about education resource equity to assessing their own system to taking action to eliminate inequities.

The first step to improve resource equity is assessing the current state of equity and excellence in your system. District leaders, working together with community members and equity-minded advocates, can use the **The Resource Equity Diagnostic** to identify which areas have the greatest gaps in equity and excellence in their school system. This **sample meeting agenda** can be used to support a four-hour workshop to diagnose resource inequities in a specific system of schools by collaboratively completing the diagnostic tool.
